ABOUT ME

I began my career in software development while working in social work. My passion for helping others and solving problems made me great at my job, but the emotionally taxing environment pushed me to pursue new opportunities. In my search I discovered a passion for coding and started a new journey.

Learning and working as a developer is a refreshing challenge. I love using my skills to find creative solutions to problems, and I am excited to pursue new opportunities to further my career.

EDUCATION

Nashville Software School

Full Stack Software Development

University of Kentucky

Bachelor of Arts in Social Work
