TECHNICAL EXPERIENCE

Nashville Software School
Software Developer | Jan 2021 - Jun 2021

NSS is an intensive, full-time software development bootcamp focusing on HTML, CSS, Javascript, React, and server-side fundamentals with Python and Django.

- Develop dynamic single-page apps with Javascript and React using modular code
- Build and support API's with Python/Django
- Maintain version control with Git and Github for individual and group projects
- Implement agile workflow on all projects
- Collaborate with remote colleagues daily

PROFFESIONAL EXPERIENCE

Rio Grande Fence Co.
Administrative Assistant | Aug 2019 - Dec 2020

- Collaborated with finance team on invoicing and billing records
- Directed customer calls and organized requests for quotes
- Assisted customers with navigating/viewing digital contract software (PandaDoc)

Lord's Legacy Life Ministries
Day Training Director | Jan 2015 - May 2019
Direct Support Staff | May 2014 - Dec 2014

Social service provider for adults with intellectual disabilities.

- Fostered positive relationships with 60+ clients, families, and case managers
- Managed a team of 5 employees
- Digitized and partially automated tracking of billable hours with Google Sheets
- Grew program from ~600 weekly hours of services to 1000+ weekly hours

Christian Student Fellowship
Associate Staff | May 2012 - May 2014

- Taught and mentored groups of 8 to 10 college students
- Managed set up for weekly events, directing groups of student volunteers
- Coordinated facilities maintenance with outside contractors
- Collaboratively planned and executed events with attendance between 25 - 1000 students

ABOUT ME

I began my career in software development while working in social work. My passion for helping others and solving problems made me great at my job, but the emotionally taxing environment pushed me to pursue new opportunities. In my search I discovered a passion for coding and started a new journey.

Learning and working as a developer is a refreshing challenge. I love using my skills to find creative solutions to problems, and I am excited to pursue new opportunities to further my career.

SKILLS

- JAVASCRIPT
- REACT
- HTML
- CSS
- GIT/GITHUB
- Python
- Django

PROJECTS

Parkbook: View Code

Parkbook is an application for discovering new parks around Nashville and learning what they have to offer.

- Full CRUD React application
- JSON server used for local database
- Active search/filter by park feature

Brew_share: View Code

A digital journal for recording and sharing your favorite methods of enjoying coffee.

- Full stack application built with Django REST framework
- Custom permissions allow admin users to moderate content
- Data stored in SQLite 3 database
